

right	Which side of the heart sends oxygen-poor blood to the lungs?
left	Which side of the heart pumps oxygen-rich blood to the body?
septum	What is the wall that separates the left and right sides of the heart?
vena cava	What is the large vein that carries oxygen-poor blood to the heart?
right atrium	Which heart chamber receives oxygen-poor blood from the body?
tricuspid	Which valve prevents the back-flow of blood from the between the right atrium and ventricle?
right ventricle	Which chamber of the heart pumps the oxygen-poor blood to the lungs?
pulmonary	Which valve seals the right ventricle and prevents back-flow from the pulmonary artery?
pulmonary artery	Which blood vessel carries oxygen-poor blood from the right ventricle of the heart to the lungs?

pulmonary vein	Which blood vessel carries oxygen-rich blood from the lungs to the left atrium of the heart?
left atrium	Which chamber of the heart receives oxygen-rich blood from the lungs?
mitral	Which valve between prevents the back-flow of blood from the ventricle to the atrium?
left ventricle	Which chamber of the heart that pumps the blood to the rest of the body?
aorta	Which blood vessel carries oxygen-rich blood from the left ventricle of the heart to the body?
arteries	Which blood vessels carry blood away from the heart?
veins	Which blood carry blood back to the heart?
capillaries	What are the smallest blood vessels which deliver oxygen to body tissues and pick up waste products?
red blood cells	What are the oxygen carriers of the blood?

plasma	What is the liquid part of the blood which is mostly water and dissolved nutrients?
White blood cells	What are the infection fighters of the blood?
platelets	What are small cells which form clots and scabs to plug up damaged blood vessels?
right	Which side of the heart sends oxygen-poor blood to the lungs?
